

ALP CR Harness

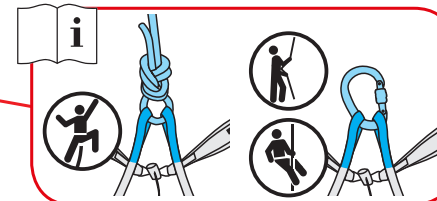

Ref. 3169

Super light and compact harness for ski mountaineering and lightweight mountaineering

Hypalon® slots for removable gear loops can also accommodate Hub racking carabiners

High strength UHMW polyethylene tie-in points

Hypalon® cord adjustments for exceptional durability

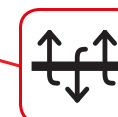

Adjustable waist belt with elastic cord

Elastic straps that connect the waist and legs are adjustable with elastic cord

The attachment point on the back of the leg loop for connecting the waist and legs can be used to hold the tip of an ice screw to prevent it from moving around and damaging pants

All-mountain functionality allows the harness to be put on and taken off without removing skis or crampons. Adjustable leg loops with 7075 T6 aluminum alloy buckles.

Innovative construction uses nylon monofilament and high strength UHMW polyethylene (Ultra High Molecular Weight Polyethylene)

Super breathable
